Office Action Summary

Application No.

10/684,911

Applicant(s)

REYNOLDS ET AL.

Examiner

Robert R. Raevis

Art Unit

2856

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 97-119 is/are pending in the application.
- 4a) Of the above claim(s) 97-116 and 119 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 117 and 118 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election of claim 117,118 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 117,118 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kaptur, Jr. et al.

Kaptur et al teach a device to check whether the seat of a vehicle is satisfactory for accommodation by an occupant (see col. 1, lines 10-15), the device including: back pan and seat pan 66 that collectively simulate the torso of the occupant, the outer contour located on the torso, the outer contour 68 of the torso conforming to a deformed shape of an interface contour between a seat and a seated occupant as viewed in Figure 1. The device includes legs and feet, the torso of which is located relative thereto. The device is used as a geometric checking device, and thus is a template. The device is applied to determining if the compressibility of the seat should be changed. (col. 4, lines 70-75)

Kaptur does not state that the device is employed in "design".

As to claims 117,118, either the determination of if the compressibility of the seat should be changed is inherently design, suggestive that the device is a design template; or it would have been obvious to use determinations of the device to change the design of vehicles to be constructed to increase accommodation and comfort of the occupants of vehicle in future vehicles because it is known to improve new models relative to existing models.

Claims 117,118 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over AUTO (SU 0508711).

Auto teaches a device to measure dimensional parameters within a vehicle, comprising (Figure 1): a torso 2,4, the outer contour of the torso conforming to a deformed shape of an interface contour between a seat and occupant as shown in Figure 6. The device is used in "motor car anthropometry", anthropometry being the study and technique of human body measurement for use in anthropological classification and comparison, suggestive that the device is used as a gauge or template.

The Constitution of Auto does not use the term "design".

As to claims 117,118, either the device is inherently employed to design vehicles, or in the alternative, it would have been obvious to redesign vehicles to be subsequently manufactured according to measurements made with Auto's device, to allow for more occupant space or even a safer vehicle to remove/relocate possible points of impact.
